Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a method for processing of multicomponent liquid mixtures, classified in class 203, subclass 91.
- II. Claims 2-5, drawn to a plant for multi-component liquid mixture processing, classified in class 202, subclass 205.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as: a plant for processing of hydrocarbon liquid mixtures comprising at least a distillery section with an oil delivery pipe, a vacuum column and a vacuum hydrocyclone unit, and the plant is further equipped with a second jet device with its liquid inlet connected to the crude oil delivery main, and its gas inlet connected to the separator gas outlet; and a device for vacuum distillation of multi-component organic mixtures comprising, an evacuating device, a horizontal vacuum chamber, a head delivery main and a discharge main and control instrumentation (RU 2166528) as recognized by applicants, noting e.g., pages 2-3 of the specification.

Art Unit: 1764

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification; and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)
